

19 November 1973

David Johns,
Planning Secretariat,
Room 132,
Legislative Building,
Winnipeg, Manitoba.

Dear David:

It was good talking with you at the conference last week. I hope things go well.

I am enclosing a copy of the Ontario Government's "Green Paper on Environmental Assessment", as well as a copy of our brief in response to it. I hope it may be of assistance to you.

I'm looking forward to receiving those studies you mentioned (i.e. the Highway 391 study and the one with regard to the proposed town). From the short discussion we had concerning them they sound as if they will be quite helpful on two similar projects presently thrashing around in Ontario.

I'm also enclosing some background information on CELA and CELRF, as well as some past issues of our newsletter, the Canadian Environmental Law News, to give you an indication of what else we've been up to.

Perhaps the Secretariat might be interested in subscribing to the CELN to help keep an impecunious public interest organization in the groove. It's educational too!(!?).

Take care, and keep in touch.

Yours very truly,

CANADIAN ENVIRONMENTAL LAW ASSOCIATION
