CONSERVATION COUNCIL OF NEW BRUNSWICK

CP / BOX 541, FREDERICTON, N.B.

CONSEIL DE CONSERVATION DU NOUVEAU-BRUNSWICK

September 11, 1974.

Mr. J. F. Castrilli,
Canadian Environmental Law Association,
Suite 303,
One Spadina Crescent,
Toronto, Ontario.
M5S 2J5.

Dear Mr. Castrilli:

I am sorry to have taken so long to answer your letter concerning the brief to the Provincial Government. I will enclose a copy of our brief to the New Brunswick Government and a copy of a press release regarding the so called impact studies and releases. I have also written to Madam Sauve asking her to impliment the policy of her department as stated by a press release last April by the Hon. Jack Davis which stated that impact studies and public hearings would be held into all projects with considerable amounts of federal funds involved and which might affect the environment. The Point Lepreau Project fits in here.

We are now trying to raise funds to get a recognized authority to be guest speaker at our Annual Meeting in November.

Yours very truly,

K. K. Langmaid,
President.

*I'll send the copy of the Press release as soon as I find it
it has disappeared off my desk.*
