Dear Sir/Madam:

Re: Halton's Landfill Environmental Assessment
(File: 3708.437)

Please find enclosed a copy of two Landfill Environmental Assessment staff reports concerning 1) Stage 2C Final Work Program Completion Date Update and 2) Stage 2C Submission of Hydrogeological Test Drilling Results.

The first staff report outlines completed Stage 2C work to date and explains why further work has been delayed by at least one month. The revised completion date for the Stage 2C Work Program will be established at the September 5th Regional Council Meeting. The second staff report describes the contents of a report proposed by Hydrology Consultants Limited entitled, Halton Environmental Assessment Hydrogeologic Test Drilling Information, July 27, 1984. The hydrogeological report is technical in nature and can be reviewed by the general public at the Regional Planning and Development Department at the above address.

I hope that you will find these staff reports informative and if you require additional information, please contact myself at 827-2151 extension 237 or Paul Attack at extension 244.

Yours truly,

R. Mohammed
Director of Planning and Development
