9 September 1992

**re: First Binational Workshop on Sunsetting Hazardous Chemicals
in the Great Lakes Basin**

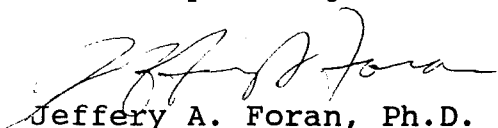

Dear Workshop Participant:

Please find enclosed a final agenda for the Sunsetting workshop to be held in Traverse City, Michigan. Receipt of this material confirms your invitation to the workshop and your room reservation at the Holiday Inn in Traverse City. If you have made a room reservation and cannot attend the meeting, you should inform us as early as possible but absolutely no later than 18 September. Otherwise, you will be charged for the room. Please inform Dr. Jeffery Foran (202-994-2587) or Ylang Nguyen (202-994-5178) of any cancellations. Rooms and meals for all individuals who attend the workshop will be paid for by the G. Washington Univ.

You should read the enclosed documents in preparation for the workshop. We realize that we have included a substantial amount of material; therefore, if you cannot read all of the material, we encourage you to focus your efforts on the following: Bo Wahlstrom's article in Nature, and pages 1-10 and 66-69 of the Sunset Screening and Scoring Document. This material should provide the minimum amount of information on the issues that will be discussed at the workshop.

If you have any questions about the workshop, about the enclosed materials, or about logistics for the workshop, please don't hesitate to contact Ylang Nguyen. We are very excited about the workshop and we look forward to seeing you in Traverse City.

For the planning committee,

Jeffery A. Foran, Ph.D.
Associate Professor and Director
Environmental Health and Policy Program
Dept. of Health Care Sciences
