Dear All,

I'm afraid given that we now have a nuclear life-cycle impact study underway, and that our access to some fairly critical information rides on ensuring a perception that the findings are not a forgone conclusion, PIAD can't sign off on the letter as modified.

Mark.

Shawn-patrick and Albert here is the letter revised by Albert and slight revision by me including list of sign-on groups at end that we have received so far. I will send it to the list that I originally sent April 26/05 but Shawn I think you were adding some folks so please include anyone else as I can't see who you sent your meeting notice to. The main comment most people had was to set out what we stand for in the letter so thanks Albert for starting that. I presume we'll discuss this tomorrow. Thanks. Theresa
